INSTRUCTION MANUAL

What if AdventureQuest was released way back in 1985?

No internet!? You could not have made your own character online. What would Artix have done without you there to help him!? Find out in this alternate 8-bit timeline...

## THE STORY SO FAR...

By the time you arrived, the DoomKnight had already destroyed your home town. Everyone is gone. There is no one else to stop the army of the evil undead... except for you.

Armed with your battleaxe and calling in a favor from Twilly, the little red moglin, you ride on a dragon to reach the DoomKnight before he can get home to his castle. You must defeat him, before the largest undead army the world has ever seen begins its undead assault.

## THE DOOMKNIGHT, SEPULCHURE

A DoomKnight is the absolute master of the undead. Commanding an army of skeletons, zombies, death knights, liches, and the ancient undead with one goal... to engulf our world in darkness and absorb it into the plane of shadows.

## ARTIX

You are the good Paladin, Artix. Weilding your axe, the Blinding Light of Destiny, you battle the evil undead.

Unable to cast light magic, spirits you free may help power you.

## DAIMYO

Undead Slaying battle puppy. Likes to fetch bones. "Arf!"

## GRAVELYN

Gravelyn was raised by the undead within the walls of the flying undead dragon fortress. Darkness is the only path she has ever known. It is possible she even thinks she is undead. (She is not.)

PRO TIP: Gravelyn will act as your guide in Dungeons & DoomKnights... showing you where to go next. Or maybe try to kill you.

Hard to tell...

## HOW TO PLAY DUNGEONS & DOOMKNIGHTS

Your quest is to defeat the DoomKnight. Explore the world, defeat villains, gain powers, and reach level 13 to assault DoomKnight's castle! Beware of bad puns, retro game references, and being seduced by the powers of darkness.
